

Keep this place Bear Smart

Store ALL attractants in a bear-proof manner inaccessible to bears 24/7

- This means all garbage, recycling, compost, used fryer oil, and food deliveries.
- Keep bus bins and garbage/recycling bins inside, not on the patio.
- Waxy paper products with food residue go in the garbage. Non-waxy paper products with food residue go in the compost.

Keep bears out to keep them (and us) safe!

- Kitchen and waste storage doors are especially vulnerable. Keep them closed.
- Back doors and windows are also entry points so close them too.
- **ALERT!** Bears may wander in through the front door. Keep it secured!
- Bears are active day AND night!

If a bear shows up...

- Before taking action, be mindful of bystanders and ensure a clear escape route for the bear.

If it is safe to do so:

- Yell authoritatively to deter him; you can also bang metal trays or sound an air-horn.
- Recruit other staff to help, if possible.

If the bear enters the patio or restaurant:

- Get everyone to a safe spot, either in the restaurant or as far away from the bear as possible.
- Do not let anyone approach the bear or encroach on their space.
- Never block the bear's escape route.
- Call Conservation Officer Services at **1-877-952-7277** or **#7277** by cell phone.
- Wait for help to arrive.
